

IDEAS

4 combine and refine

this way
we can see how our schools are distributed

- Question
- will the story be well structured
 - what colour palette best suits the visualisations
 - is the story visualisation accurate for the data to be used.

layout

Title: large Map focus

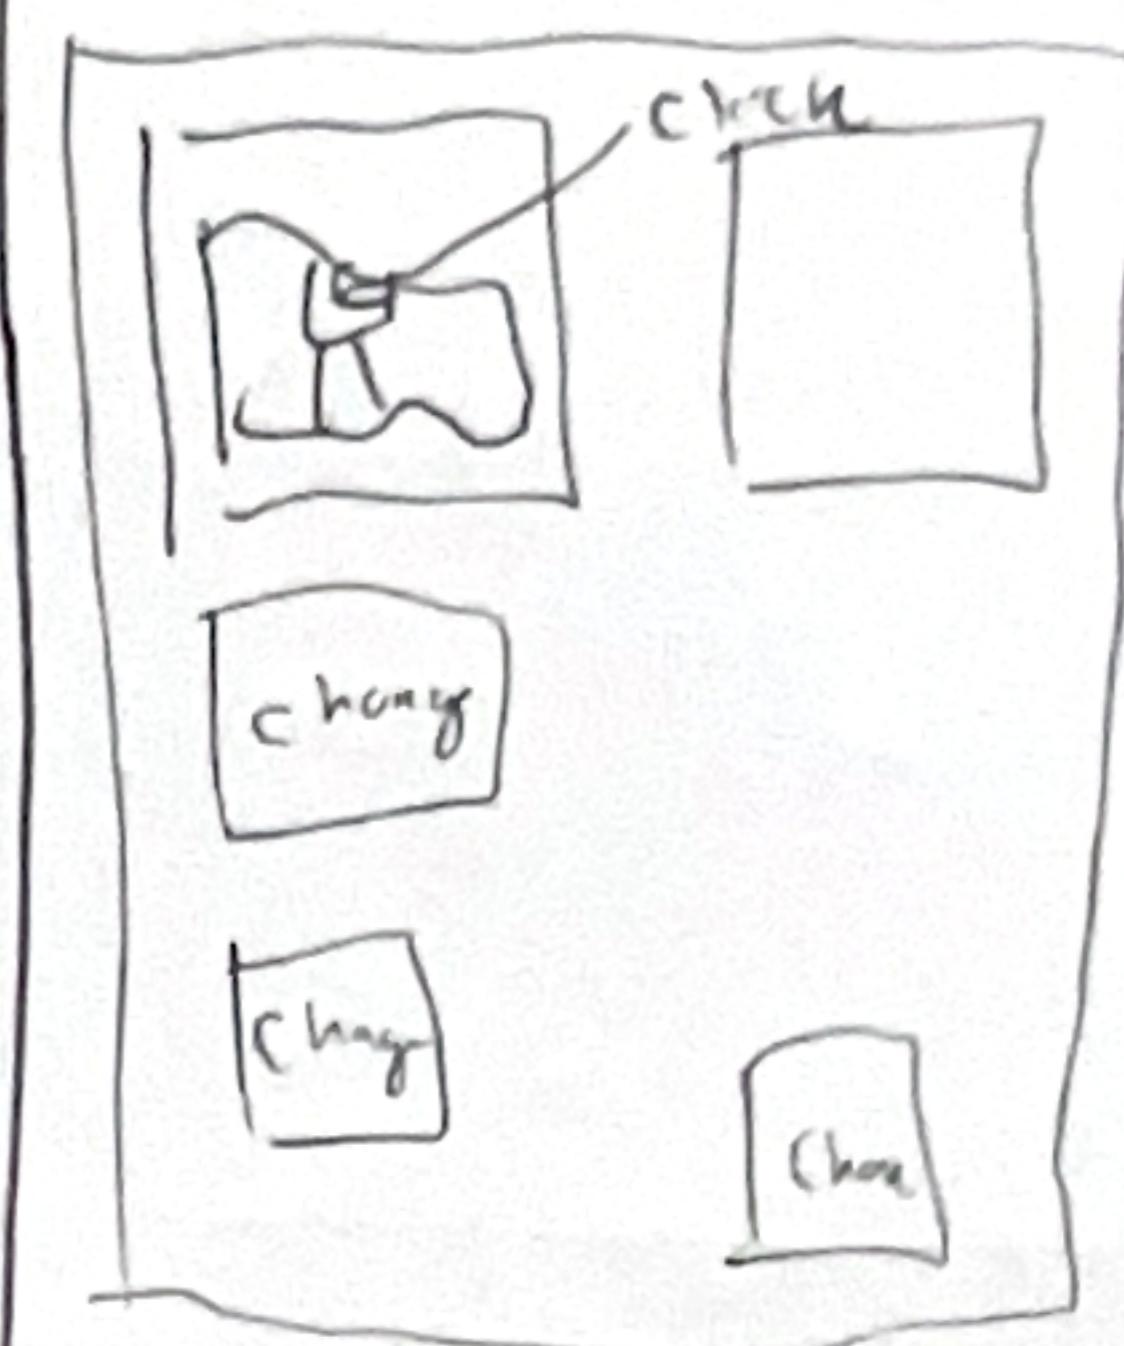

Author: Gagandeep

Date: 20-10-2025

Sheet: 2

Task: Public vs Private school victoria

2

changes the focus

onto the local government areas as this will give the user the larger comparisons

Focus

Discussion

The focus is at the top so as the user scrolls the maps may not appear depending on their screen size.

- if scaled down to accommodate all sizes the visualisations may be distorted.

- too much info when switching LGA.

Title: School based webpage

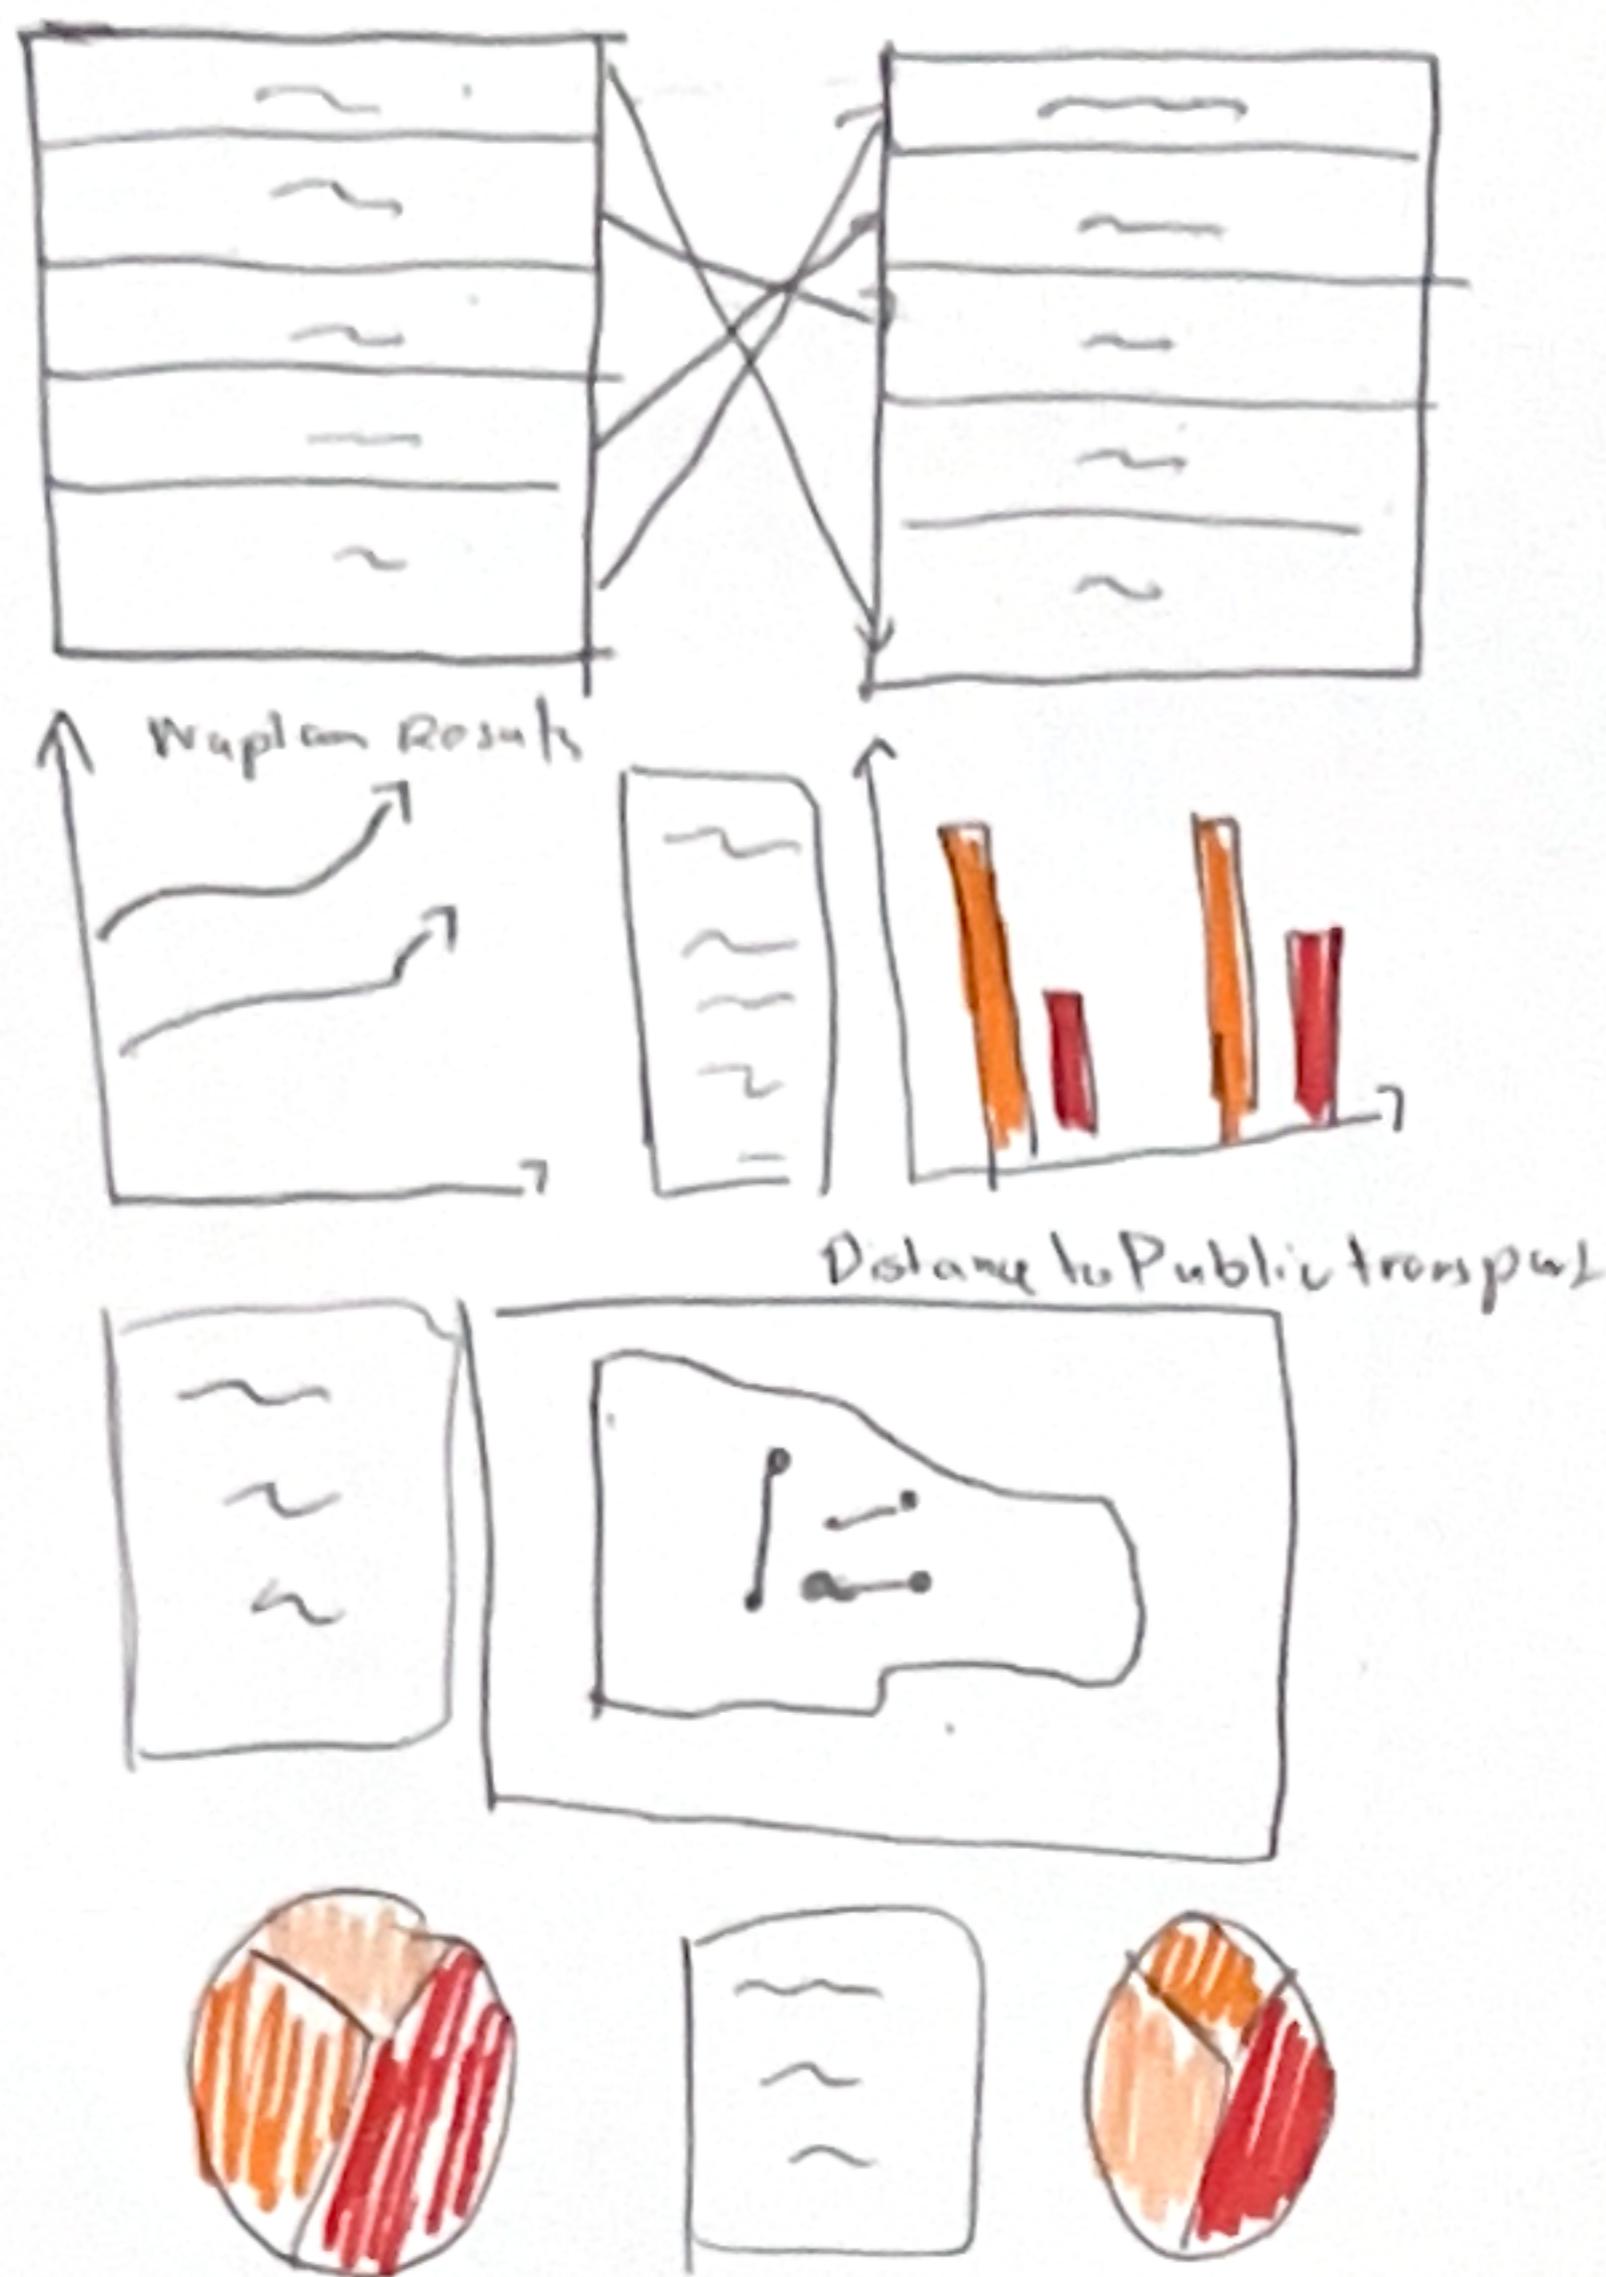

Author: Gagandeep

Date: 20-10-2025

3

Task: Public vs Private Schools

Public vs Private Schools in Vic

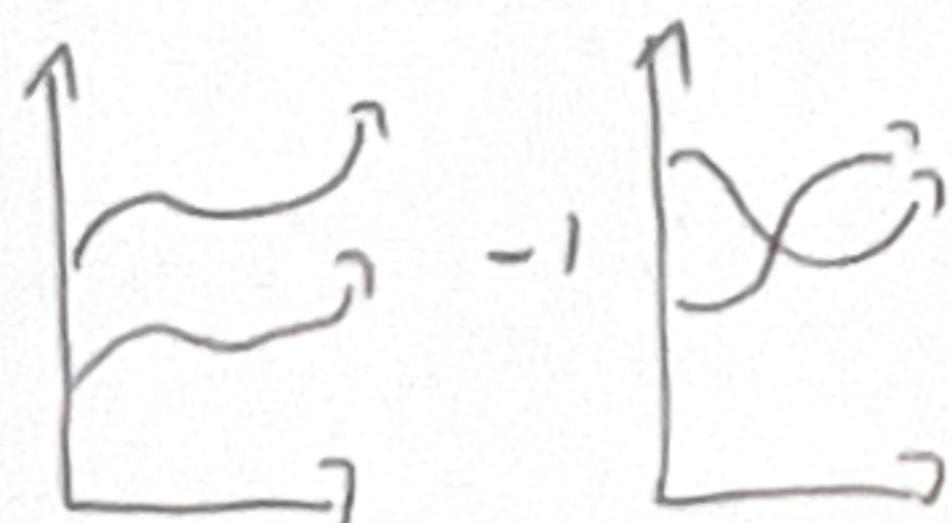

the point will be to click and compare the top 5 schools of each sector

Focus

will be on

by click on one box in each different table, the user will be able to compare the two different schools.

the visualisation will all be paired to allow the user to have better insights

Discussion

- Scenario far too complex
- Technically will require $25 \times$ number of visualizations of work done
- has the benefit of giving much deeper insights i
- is not feasible in the time frame.

Date: 20-10-2025

Task - Public vs Private Schools

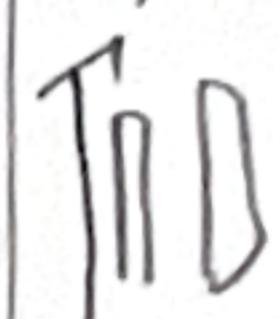

Operations

Not much operations on this webpage

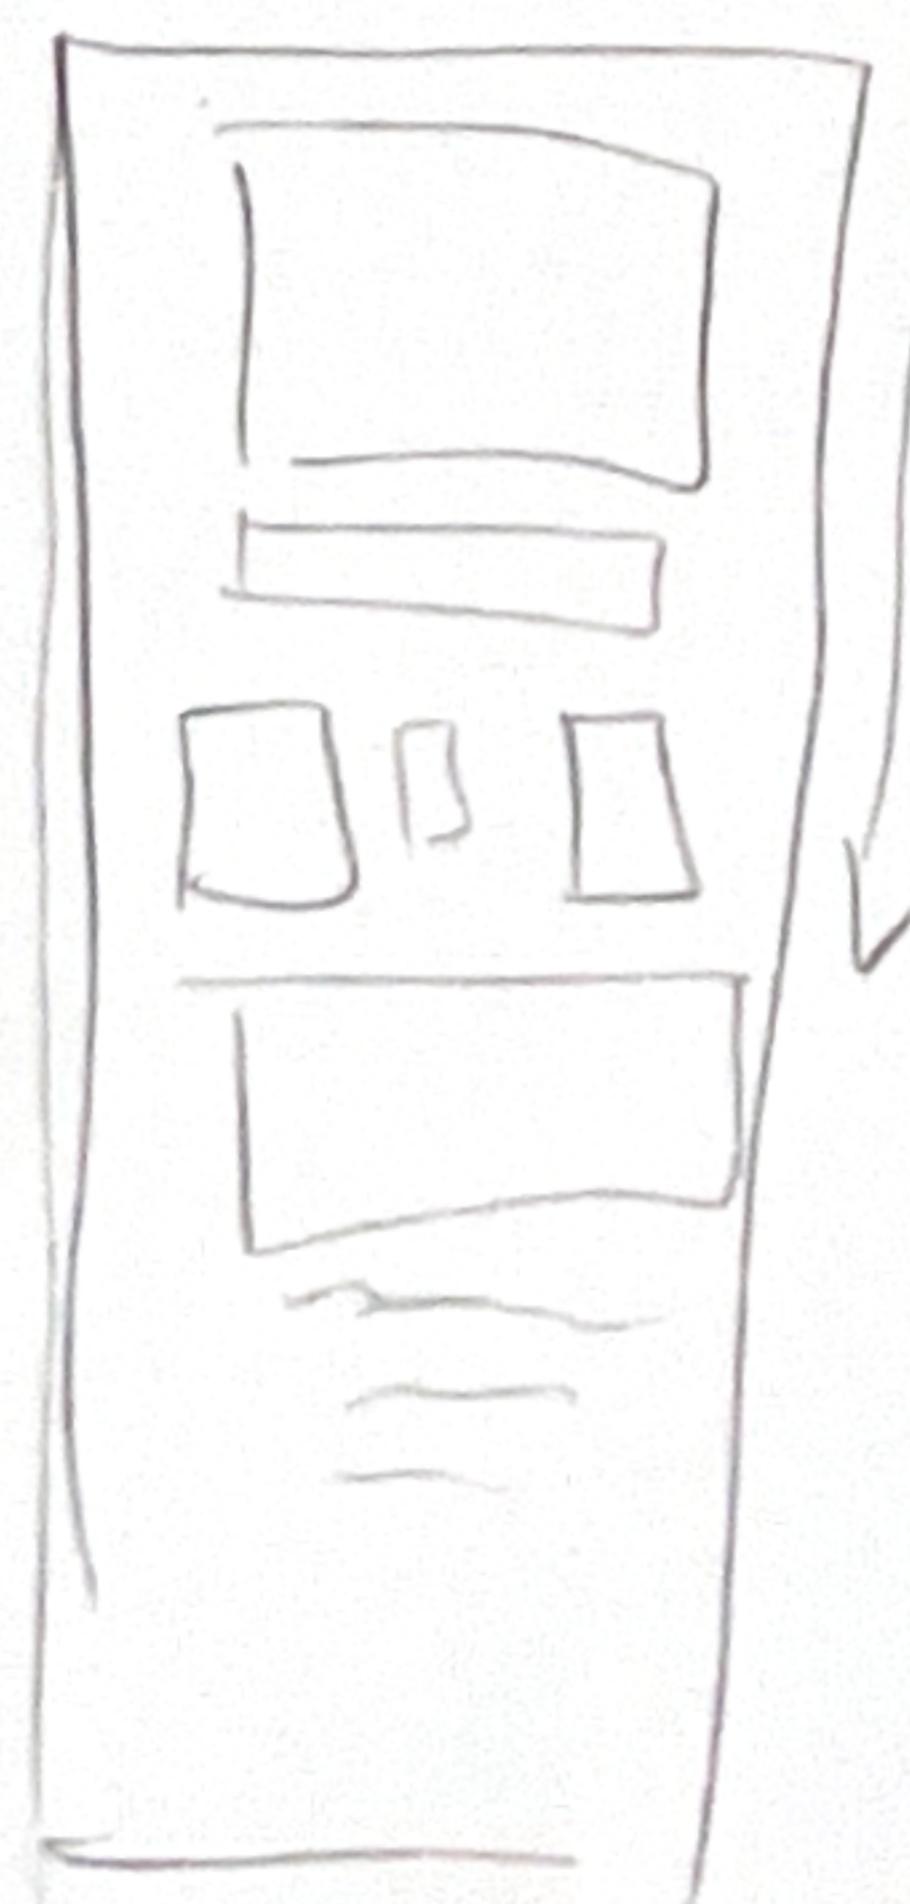

on the first map you can change the sector you would like to see the distribution of

as a slider to change the year.

Focus

The focus of the map is trying to tell a linear story that is easier for the user to understand and follow

Discussion

- Seems the most feasible given the time frame
- least interactivity so it can focus on storytelling
- can't cover a very broad dataset

Layout

Title: Final layout

Sheet: 5

Task: FIT3179 Assignment 2

(Operations)

not many interactin feature,
on the

Focus

the focus of this webpage will be on the
distribution of schools in victoria
as this is the best story

• Detail

- Database fixes and wrangling
- creating the visualisations
- creating the webpage
- styling the webpage
- uploading to github
